Focused on mobile and web development using React and React Native.
Consumed RESTful APIs, handled user authentication, and deployed apps on the Google Play Store.
-

PROJECTS

1. Esoptron Salon Web System

Developed a PHP Laravel web application for booking services such as hairdressing, manicure, pedicure, and makeup. Integrated APIs. Also, worked on a Flutter mobile application for the salon app.

2. Esoptron Salon Website

Created an interactive community engagement platform for Esoptron Salon, incorporating features like service listings, service provider details, and real-time booking using APIs. This platform was developed using Laravel

3. Plussave Financial Solutions

Worked on the frontend and backend of a financial services website, where users can apply for loans and manage savings using custom financial planning tools. This project involved API integrations, backend logic using Laravel, and a mobile app using Flutter.

YouTube Channel: Computer Science Simplified by Gorret Golden

I created and manage a YouTube channel focused on simplifying computer science concepts for beginners. The channel covers programming tutorials, technical tips, and software development guidance for aspiring developers.
